

EXONAR SARLUTION

We make subject access requests simple

Our Case Management platform shows you where you are with your access request cases and progression to completion - with ease.

We don't know where to start – SARs can be massive in size

Many systems, departments, processes, people and business units will be involved when fulfilling a subject access request. For many organisations the solution to date starts with an email to line management, followed by a huge amount of printed content to be reviewed and collated before being dispatched by courier in a couple of boxes to the individual.

What's all the fuss about?

The UK's Data Protection Act was superseded in May 2018. The new EU General Data Protection Regulation (GDPR) will give citizens more control of their data. Organisations need to reverse their traditional view of how they handle and process customer and employee information. The individual rather than the organisation is now in control courtesy of the following rights: The right to be informed – The right of access – The right to rectification – The right to erasure – The right to restrict processing – The right to data portability – The right to object and Rights in relation to automated decision making and profiling. A number of these involve considerable time, effort, energy and cost.

In our recent survey 57% of individuals said they would want to request their data once there is no longer a cost.

Why spend days when you can process access requests in minutes?

Exonar now offer an easier way to deal with access requests – use technology.

We know how expensive and disruptive access requests can be to your organisation. The Exonar platform is automated and intuitive, providing rapid processing of these requests.

Build an index of all of your information and make it instantly searchable by connecting to your customer data; emails, databases, word documents and spreadsheets, in your file shares or in the cloud.

We use Machine learning to help you find all of the right information that you need whilst managing and tracking your access requests progress online.

The Exonar SARLution gives you -

Easy Processing - The platform allows you to process, redact and produce access requests directly.

Simple Dashboard - Our dashboard gives you a complete overview of where you are with cases including detailed reporting and insight into bottlenecks.

Easy Templates - Easy to create templates allow untrained users to instantly find information related to an individual.

Document Drill-down - Documents can be easily reviewed without the need to access the originals.

Redaction & Remediation - Machine learning identifies and redacts all personal and commercial information for remediation.

- **Discover** your most sensitive, valuable and personal information.
- **Understand** exactly what it contains and where it is to create a clear information inventory.
- **Act** to bring it into policy quickly and monitor it accurately thereafter.

We use indexing - not scanning - to deliver instant results and iterative queries. Our machine learning understands what's important, where it is and who has access to it to save you time. Our platform operates in near real-time - so once you've completed an initial audit, simply switch to monitor and maintain mode with alerts and integrations to your other information management platforms.

Find & Fix Your Data
Understand & manage information
instantly, simply, at scale.

Exonar solves a problem common to all organisations and their information owners, "I just don't know what I've got".

Plug Exonar into your network to instantly discover:

Confidential documents | Duplicate files | Employment contracts
Encryption keys | Personal data | Passwords ... whatever you need to find.

Achieve successful:

Compliance with regulations such as GDPR | Right of access request processing | Information security & governance
Risk management | Document retention | Cloud migration and governance.

Connect to a range of data sources:

Windows | SharePoint | Exchange | Office 365 | OneDrive
Databases and business systems.

Connecting Exonar to your network is simple and our dashboards are easy to use. Once installed, our crawlers will begin to index your data and deliver results on the same day.
